

IANPHI ANNUAL MEETING: October 17-20, 2016 SHANGHAI, CHINA

WORKING AGENDA

Time	Session
MONDAY, OCTOBER 17	
	Registration
9:30 am – 2:30 pm	<i>High-Level Strategic Planning Meeting (by invitation)</i>
9:00 am – 4:00 pm	<i>IANPHI-Africa Regional Meeting (by invitation)</i>
3:30 pm – 6:30 pm	<i>Executive Board Business Meeting (by invitation)</i>
6:30 pm	<i>Welcome Dinner</i>
TUESDAY, OCTOBER 18	
	Registration cont'd
8:30 – 9:00 am	<i>Opening/Welcome</i>
9:00- 10:45 am	<p>Plenary Panel 1 –</p> <p>Celebrating IANPHI: 10 Stories from the First Decade</p> <p><i>From the seed of an idea planted in 2006, IANPHI has taken root and flourished over 10 years into a vigorous force for improved global health through development of and linkages among the world's NPHIs. In this session, we hear from ten champions who were there from the beginning -- offering their memories, insights, and inspiration.</i></p>
10:45- 11:15 am	Break
11:15am-12:30 pm	<p>Plenary Panel 2 –</p> <p>Building IANPHI's Role in Global Health Security: Lessons Learned – A H1N1, Ebola, Zika, and Other Global Health Threats</p> <p><i>As a group, we will define how IANPHI, in partnership with WHO, can add value to the Global Health Security Agenda. In the context of emerging global health threats and through the experience of NPHIs participating on the panel and those who enrich the discussion from the floor we will draft a set of actions regarding global health security, IHR implementation, and capacity building. Where do we want to be in the next 10 years?</i></p>
12:30 – 2:00 pm	Lunch

	Working Lunch: Health Information Systems
2:00 – 3:15 pm	<p>Concurrent Session 1:</p> <p>Engaging NPHIs and IANPHI in Disaster Risk Reduction</p> <p><i>The Sendai Framework, adopted by 187 Member States in March 2015 at the 3rd World Conference for Disaster Risk Reduction in Sendai, Japan, puts health at the center of global policy and action to reduce disaster risks for the next 15 years. This session provides an opportunity to consider the role of NPHIs and IANPHI vis-à-vis that of other government entities, the private sector, and other stakeholders.</i></p>
	<p>Concurrent Session 2:</p> <p>Driving Policies Through Evidence: How Data Can Lead to Change</p> <p><i>Join a roundtable discussion of how data have led to sound public health policies, for example to optimize vaccine delivery, promote safe behaviors, reduce unsafe exposures, and generally improve health and quality of life in communities and nations. Explore strategies and approaches to help NPHIs reduce the gap between evidence and practice in related to NCD prevention/control and other emerging issues.</i></p>
	<p>Concurrent Session 3:</p> <p>How Did You Do It? – NPHI Creation Stories/Case Studies</p> <p><i>Countries embarking on NPHI development invariably have the same question for those who have succeeded. The panel will share experiences in NPHI creation – e.g., the decision-making process, political & policy considerations, legal frameworks, organizational options to maximize functionality and integration, and leveraging of vertical funding to support broader public health initiatives.</i></p>
3:15 – 4:00 pm	Break
4:00 – 5:15 pm	<p>Concurrent Session 4:</p> <p>Laboratory Services, Networks, & Systems: Models for Building Capacity in NPHIs</p> <p><i>Laboratory services are a key component of national health systems but often remain among the most neglected components of the overall health system in resource-constrained countries. Share experiences and lessons learned on building lab capacity in NPHIs. Topics to be addressed include quality management systems, biosafety & biosecurity, implementation of national laboratory networks, and support for lab-based surveillance for epidemic-prone diseases.</i></p>
	<p>Concurrent Session 5:</p> <p>Engaging with the Private Sector in Addressing Public Health Challenges</p> <p><i>Cross-sector partnerships with the private sector have become an accepted practice in public health in many countries, particularly in efforts to address infectious diseases. Increasingly, these partnerships are also becoming a favored tool in efforts to reduce and prevent obesity and other non-communicable conditions. Hear about the experiences of some NPHIs, and join a discussion of opportunities for working with the private sector, types of private entities to work with, pros and cons of public-private partnerships, and considerations for managing these relationships.</i></p>
	<p>Concurrent Session 6:</p> <p>IANPHI Tools for Development and Growth of National Public Health Institutes</p>

	<p><i>In support of our NPHI development mission, IANPHI continues to create and enhance practical tools for use by member NPHIs. Learn about how two of these resources – the Staged Development Tool (SDT) & the Peer-to-Peer Evaluation Initiative – are helping NPHI directors demonstrate their organization’s accomplishments and identify areas for growth and improvement. And find out how your institute can benefit from these unique instruments that reflect 10 years of IANPHI’s experience.</i></p>
6:00 pm	Social dinner
WEDNESDAY, OCTOBER 19	
9:00 – 10:30 am	<p>Plenary Panel 3:</p> <p>Managing Public Health Crises & Controversies: Creating an Effective and Pragmatic Risk Communication Program for your NPHI</p> <p><i>Natural disasters, infectious disease outbreaks, bioterrorism events, toxic hazards all have profound consequences. When the unexpected occurs, people look to public health officials for information on developments, any personal impact the events may have, and ways to protect their health and that of their families and communities. Just as we maintain vigilance for the next emerging disease, food safety event, or environmental crisis, we must also anticipate the next source of public fear and be ready to respond. In this interactive session, you will have the opportunity to share insights and inspiration about developing or enhancing a risk communication program for you NPHI.</i></p>
10:30 – 11:15 am	Break
11:15 – 12:45 pm	General Assembly: IANPHI Business Meeting
12:45 – 2:00 pm	<p>Lunch</p> <p><i>Working Lunch: Cancer Working Group</i></p> <p><i>Working Lunch: Disaster Preparedness, continued</i></p> <p><i>Working Lunch: Meeting of Staged Development Tool Consultative Group</i></p>
2:00 – 3:30 pm	<p>Concurrent Session 7:</p> <p>CHAMPS and Data-to Action</p> <p><i>This Gates-funded network of disease surveillance sites aims to gather more accurate data on how, where, & why children are dying in sub-Saharan Africa & South Asia, and ensure the delivery of the right interventions to those who need them most. The Gates Foundation envisions CHAMPS’ enduring legacy as strengthened national capacity – housed within NPHIs -- to interpret and use data to develop policy recommendations that inform government decision-making. Join a conversation with current and potential CHAMPS country representatives and partners about this data-to-action role for NPHIs.</i></p> <p>Concurrent Session 8:</p> <p>Securing the Future for the Next Generation: Call to Action to Address Adverse Childhood Experiences (ACEs)</p> <p><i>Our children are our future. If we do not create the conditions that set today’s children on a healthy life course, we will fail in our responsibilities as NPHIs to improve health and tackle health inequities. One practical way of securing the future for the next</i></p>

	<p>generation is to address adverse childhood experiences (ACEs). This session will describe the response in Wales to this 'call to action' through coordinated inter-sectoral activity and will conclude with a proposal to develop a formal international ACE Network with commitment from IANPHI members.</p>
	<p>Concurrent Session 9:</p> <p>Action Against Antimicrobial Resistance: Reports from NPHIs on the Forefront</p> <p>Antimicrobial resistance is a growing problem and major threat to health in every region of the world. This session will consider the NPHI role in activities to prevent the emergency and spread of AMR, including linkages with GHSA and related initiatives.</p>
3:30 – 4:00 pm	Break
4:00 – 5:15 pm	<p>Plenary Panel 4:</p> <p><i>Celebrating the First 10 Years by Looking to the Next Decade</i></p>
5 :15 – 5 :30 pm	Closing Remarks/Adjourn
5 :45-6 :30pm	Executive Board meeting or Foundation meeting
	Free evening
THURSDAY, OCTOBER 20	
Half day in the morning	Field visit options – Half day (sponsored by China CDC)
