Academy		The SA Listeria outbreak The Bedaquiline susceptibility testing
<ul style="list-style-type: none"> • Role of Social Sciences in Public Health Emergencies • Usefulness of Mathematical Modelling in Epidemic Preparedness and Response • Improving the Quality of Care and Control of Infectious Diseases. • Role of NPHIs in Local Burden of Disease 		Nigeria NCDC Newsletter National Coordinating Secretariat for AMR-related issues in Nigeria.
		Malawi anthrax investigations

Recognition of success

1. Burundi

- Bachelor's degree in physiotherapy is part of the program "Support to the development of Physical Medicine and Rehabilitation"
- NPHI laboratory technicians to be trained for the use of mobile laboratories and to be referents for the organization of the response at the laboratory level in the event of an epidemic
- INSP friends set up a laboratory unit for quality control of drugs. This allowed the Drug Regulatory Authority to use this service to authorize the drugs that are used in Burundi

2. Malawi

- Small Scale Field Simulation Exercise
- PHIM in collaboration with ONE-HEALTH partners was able to respond to anthrax outbreak among the hippopotamus animals in the upper Shire river in Balaka and Machinga districts in the months of December 2018 through February 2019
- JEE completion

3. South Africa

- Tuberculosis – Bedaquiline susceptibility testing
- Notifiable medical condition surveillance system
- **ANDEMIA** project, represents a transnational strategy to research and combat acute respiratory and gastrointestinal tract infections, acute febrile disease of unknown cause and the emergence of antimicrobial resistance

Thank you
