

**Concurrent Technical Session on
Monitoring and Surveillance
of Infectious Diseases**

IANPHI ANNUAL MEETING 2011

Ilesh V. Jani

Instituto Nacional de Saúde

Moçambique

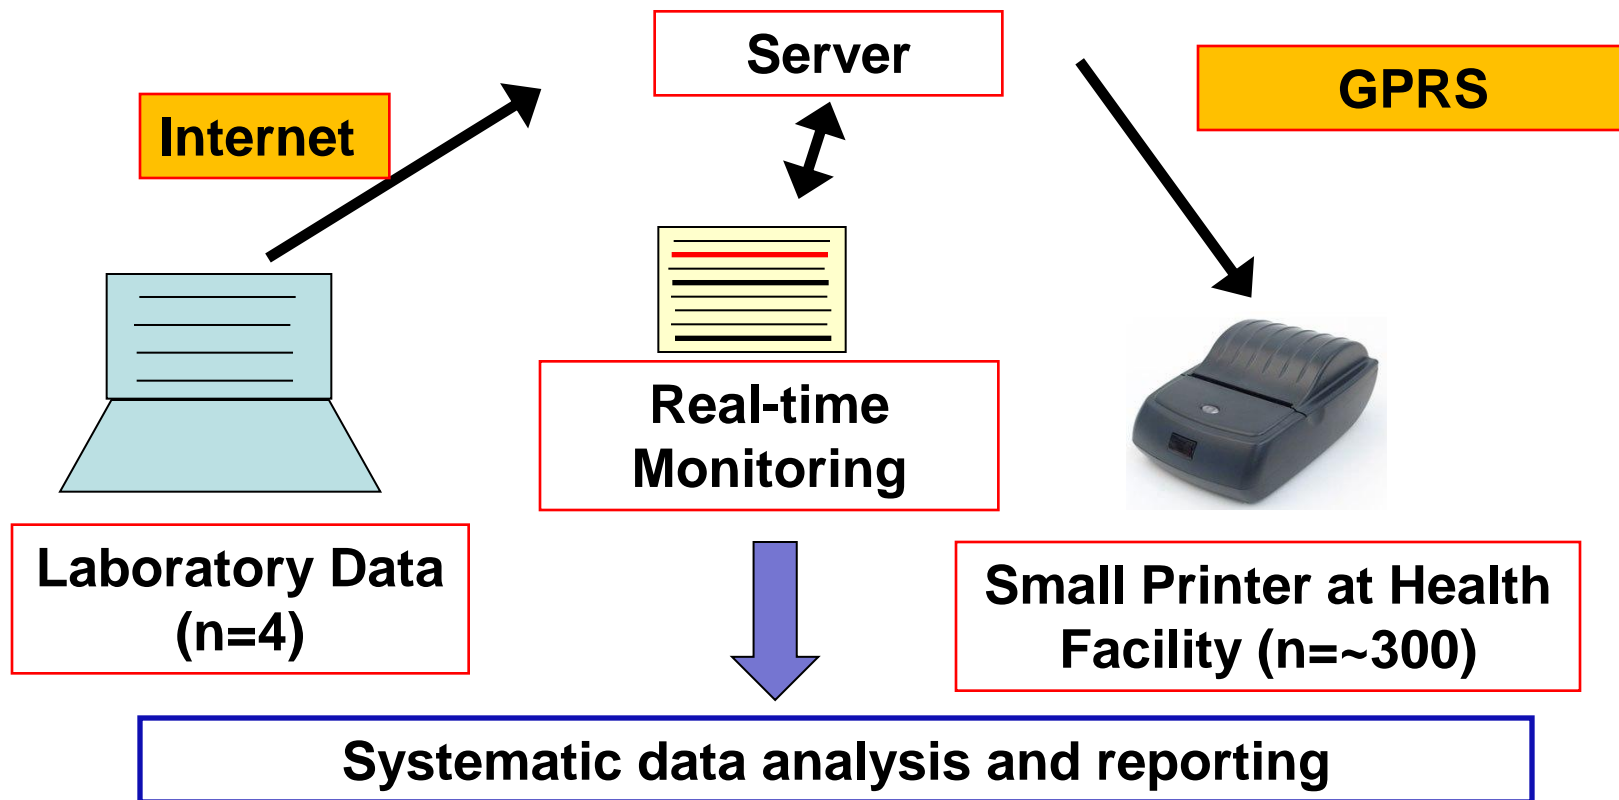

Opportunities to Learn and Build from Disease Specific Activities

- **HIV-related surveys in Mozambique in 2009-2013:**
 - Antenatal care survey (2009, 2011, 2013)
 - Community-based survey (2009)
 - Surveys among MARPs: sex-workers, truck drivers, MSM, miners (2010, 2011)
- **Opportunities for capacity building: teams, infrastructure, equipment, data processing, management...**

Opportunities to Use Information, Communication and Mobile Technologies

E.g. Data transmission on early infant diagnosis of HIV

- Possibilities to design a system for GPRS transmission of data from labs/clinics/districts to provincial/central levels and establishment of a public health data centre.

Training of the Next Generation of Health Professionals

- **The example of Field Epidemiology and Laboratory Training Program (FELTP) in Mozambique:**
 - **Training the first mozambican professionals proficient in surveillance and outbreak investigation.**
 - **Catalyzer for the establishment of an effective epidemiological surveillance system.**
 - **Opportunity to educate future generations of professionals with the culture of national and international cooperation.**

Partnership and Funding Opportunities

Leverage opportunities for strengthening health systems through joint projects between two or more NPHIs, using available funding mechanisms:

- **Bilateral**
- **Multilateral**
- **Competitive calls from several funding agencies**

THANK YOU!
