

# NPHI Evolution in Strengthening Surveillance IANPHI Meeting 2019 Addis Ababa

Dr Natalie Mayet

Deputy Director

NICD – South Africa

### NPHI – evolution in strengthening surveillance

#### 2011

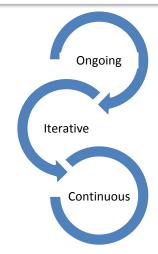

Patient - orientated clinical diagnostic based services and surveillance

- 1. Vision
- 2. Buy-in rationale; add-on "approach"
- 3. Culture shift
- 4. Strategic activities surveillance
  - operational research
- 5. Identify surveillance platforms
  - passive lab-based CDW
  - enhanced lab-based
  - active clinical syndromic based
- 6. Capacity
  - epidemiologists increase from 2-35
  - provincial epidemiologists
  - surveillance officers
  - capacity building through FETP
  - enhance IT capacity
- 7. Communication of surveillance data

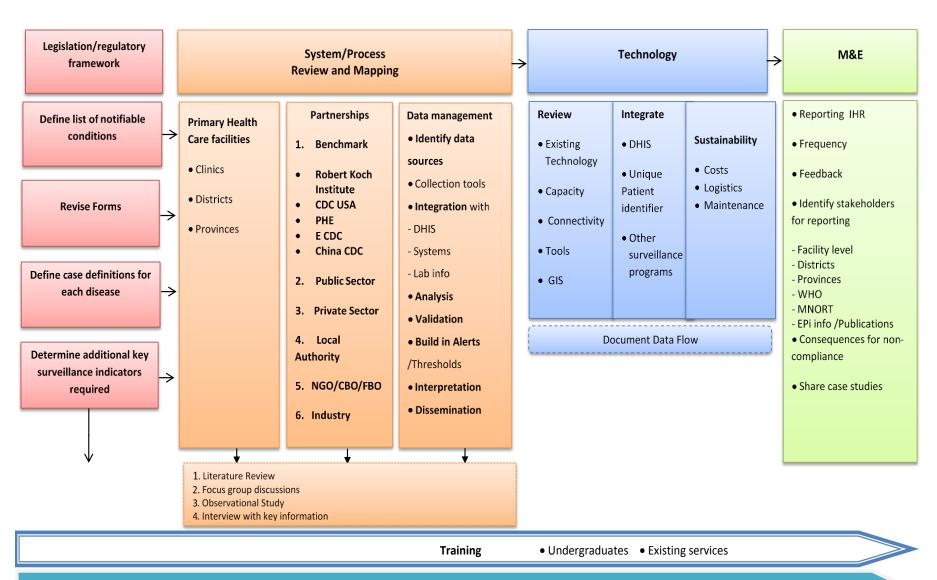

### 2019

Public Health Surveillance

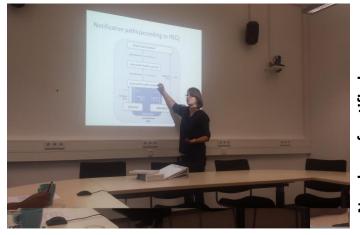

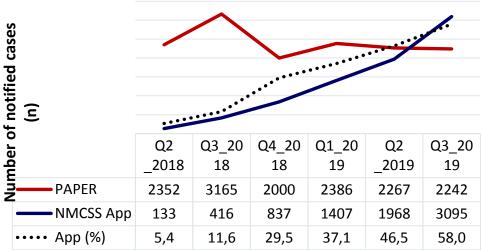

# Notifiable Medical Condition Surveillance System

Communication

### **Next Steps**

- > IDSR training integrated with FETP Frontline
- > Environmental health surveillance
- NCD surveillance and outbreak response
- Advancing technology
- National AMR / Neonatal Sepsis
- > Influence service delivery and policy with data
