## What was achieved in 2022 – 1

- Annual meeting in Tallinn, Estonia
  - “Preparing for and responding to crises: What role for national public health institutes?”
  - 25 persons attended in Tallin, 45 persons virtually
- New members
  - Montenegro and Greece
- Webinars
  - Completed: “National public health institutions (NPHIs): Exercising scientific independence during the COVID-19 pandemic” organized by PH Wales, Dr Fu-Meng Khaw
  - Planned: “Prioritisation in health – how can we elevate prevention?”
  - Planned: “Public health and social measures – filling the knowledge gap”

## What was achieved in 2022 – 2

- Ad hoc tasks and response to requests
  - The Vignette for the European Observatory published
  - Meetings with ASPHER
  - A session with DG Santé on HERA during the Annual Meeting in Tallinn
  - Regular meetings in Q1-Q2 on how European NPHIs could support Ukraine and each
  - A field visit to Poland on the border with Ukraine about the refugee situation was organized by the Polish Institute and conducted 2nd week of May
- Peerto-peer review of National Institute for Health and Development (TAI), 24-28 October

# AFRICA REGIONAL NETWORK UPDATES

# ANNUAL MEETING

NOVEMBER 30 - DECEMBER 2, 2022 | HYBRID

## Current situation

40 members are part of the Africa Regional Network, with the arrival of two new institutes

- Public Health Institute of Botswana
- National Institute of Public Health of the Democratic Republic of Congo

The African NPHIS have been exposed to different public health issues

- Emerging diseases with epidemic potential, emerging : COVID-19, Ebola, cholera etc..
- Climate change crisis : displaced populations, floods
- Security crisis : displaced populations, access to health

Major role of the network

Animation of public health activities

Sharing best practices

## 2022 Actions

Prospect of new members for the IANPHI Network in the West Africa region

Support and coordinate the communication in the IANPHI Africa Regional Network and with the IANPHI Secretariat.

- Provision of dedicated staff
- Conference calls, bilingual interactive webinars, preparation for statutory meetings
- Meetings for the development of the 2022 work plan

Some activities of interest implemented in 2022 and to be scheduled in 2023

## 2022 Activities

- March 3, 2022 - Webinar on Wastewater Surveillance for COVID-19 and Other Pathogens Led by African National Public Health Institute
  - The objective of the webinar was to share experiences, progress, and recommendations on wastewater surveillance programs for COVID-19 and other pathogens led by African National Institutes of Public Health (INSPs). Wastewater surveillance for SARS-CoV-2 has proven to be an incredibly useful tool during the pandemic for detecting new variants and tracking trends.
- June 26, 2022 - Africa Regional Network Meeting
  - Elaboration of the Africa Regional Network Work Plan for year 2022
- August 17, 2022 - Africa Regional Network Meeting
  - Validation of the Africa Regional Network Work Plan for year 2022

## African Regional Network Work Plan 2022/2023 : HIGHLIGHTS

Objective : «To strengthen the capacities of the IANPHI regional network of African National Institutes of Public Health »

- Operationnal objective: Reinforcing the network and defining its needs
- Webinars topics identified for 2023 :
  - Lessons learned from the operationalization of the NPHIs and the participations of the NPHIs directors
  - The impact of political and social commitment in the implementation of Covid-19 vaccination. Evidence from a qualitative study of Burkina Faso and Côte d'Ivoire.
- Identification of needs via side meetings and a Secretariat survey in June
  - Strong need of members implication in the regional network activitites and their implication for participation to the webinars
  - Taking into account the language bareer
- The Regional Network meeting on Friday November 2 will be an opportunity to discuss the 2023 perspectives and activities of the network.

Prof. Felix Julio Rosenberg  
Chair of the Latin America  
Regional Network

# LATIN AMERICA REGIONAL NETWORK UPDATES

# IANPHI LatAm Network Meeting 2022

INS – México  
Cuernavaca, October 5-7, 2022

## Shared Financing

- Mexico NPHI took care of all local costs, including show, group dinner at the directors' home, full lodging, translation (Spanish – English), local transportation (Airport and hotel – NPHI)
- IANPHI paid for air tickets of Colombia, Costa Rica, El Salvador and Peru (unfortunately, due to national climate emergency Cuba cancelled its participation)
- OTCA / GIZ paid for air tickets of Bolivia, Suriname and a second participant of Colombia
- Fiocruz paid for two participants

## Agenda

- Seminar: The role of the National Public Health Institutes (NPHI) in combating health inequities / Roundtable: Public Policies Facing Inequities
- Roundtable on the Role of INS in the Face of the Global Climate and Environmental Crisis
- Current and Potential Role of NHIs in Combating Food Insecurity and Malnutrition
- Participation of NPHI in Combating the Covid-19 Pandemic: Successes and Challenges
- IANPHI Action Plan
- The Role of NPHIs in Strengthening Integrated Disease Surveillance Initiative (IDS) and Health Emergency Preparedness
- Perspectives and Challenges for the Regional and Subregional Networks of National Institutes of Public Health: LatAm/IANPHI, PAHO, ORAS, OTCA

# LatAm/IANPHI 2023 – 2024 Work Plan

## HIGHLIGHTS

## Objective 1: Strengthening the institutes through peer cooperation

- Encourage the adhesion of institutes or similar from other countries to the network, including Belize, Chile, Guatemala, Guyana, Honduras, Nicaragua, Panama, Paraguay, Dominican Republic and Uruguay
- Identify gaps or needs for improvement of institutional capacities for actions in response to health emergencies
- Peer evaluation for the strategic strengthening of NPHIs
- Install a Virtual Library with reference documents of the Institutes and subregional organizations and selected bibliographies of the priority themes
- Driving an NPHI Open Science Movement
- Raise and consolidate a Network of Scientific Editors

## Objective 2: Strengthening of essential public health functions in Latin America, based on the existing capacities in each of the NPHIs

- Implement Round Tables / Presential or virtual conversations on:
  - regional epidemiological intelligence; hunger and nutritional insecurity; impact of climate change on health; Regional self-sufficiency of strategic health needs and products; Role of INS in the Training of Health Workforce; Universal Health Systems
- Presential Course on territorial characterization through RPD and cartography
- Regional Metagenomics Network for diagnosis of emerging or little-known pathologies
- Regional Observatory on Health Inequities, including access to health services

## RECOGNITION OF SUCCESS 2022 RESULTS

## RECOGNITION OF SUCCESS 2022

One winning project  
by Regional  
Network

29 Submissions

From  
24 countries

Chosen by the  
Chair and Vice-  
Chair of a different  
Regional Network

# EUROPE REGIONAL NETWORK

The selected project  
for the Recognition of Success 2022

Sciensano  
Belgium

for its outstanding success establishing a  
Belgian wastewater-based epidemiological  
surveillance program

# LATIN AMERICA REGIONAL NETWORK

The selected project for the Recognition of  
Success 2022

Instituto Nacional de  
Salud  
El Salvador

for its outstanding success of capacity  
strengthening of health professionals to  
provide high-quality medical care in the  
network of establishments of the National  
Integrated Health System

# ASIA REGIONAL NETWORK

The selected project for the Recognition of  
Success 2022

## National Institute of Health Pakistan

for its outstanding success establishing and  
operationalizing a National Command and  
Operations Center (NCOC) for COVID-19  
Emergency Response.

### Rationale and strategic approach:

Given the scale of emergency due to the pandemic, multisector coordination was needed. The Government established a National Command & Operation Centre (NCOC) in April 2020 using the “One Nation” approach with active representation of all the relevant stakeholders, provincial governments, and district administrations. By virtue of its unique expertise, the NIH remained the permanent and most important member of NCOC and supported the COVID-19 emergency operations and response.

The selected project for the Recognition of  
Success 2022

## National Institute of Health Pakistan

for its outstanding success establishing and  
operationalizing a National Command and  
Operations Center (NCOC) for COVID-19  
Emergency Response.

### Achievements:

1. The operational coordination mechanism provided technical support for routine operations regarding COVID-19, including lab testing capacity, contact tracing, field operations, lockdown guidelines, disease management, and treatment guidelines.
2. After two successful years functioning for COVID-19 operations and response, the NCOC was effectively institutionalized at the NIH in March 2022.

The selected project for the Recognition of  
Success 2022

## National Institute of Health Pakistan

for its outstanding success establishing and  
operationalizing a National Command and  
Operations Center (NCOC) for COVID-19  
Emergency Response.

Prominent aspects of this initiative that have led  
to this recognition:

1. This way to approach pandemic response shows  
great originality, respecting and making more relevant  
the role of NPHIs.
2. The project presents an innovative strategy to manage  
the pandemic that also allows to render more solid the  
position of NPHIs as critical factors in the implementation  
of relevant policies in Public Health.

# AFRICA REGIONAL NETWORK

The selected project for the Recognition of  
Success 2022

## National Institute for Communicable Diseases South Africa

for its outstanding success Building a  
collaborative modelling consortium for COVID-  
19 in South Africa

### Rationale and strategic approach

- There was a great need to model the development of the pandemic.
- Mathematical modelling skills were scarce globally and within South Africa.
- NICD established the South African Covid-19 Modelling Consortium (SACMC) comprising of a wide variety of experts to identify the priority policy questions and co-ordinate available modelling capacity.
- The Consortium provided regularly updated long- and short-term projections which was instrumental in providing timely decision support to policy makers.

The selected project for the Recognition of  
Success 2022

## National Institute for Communicable Diseases South Africa

for its outstanding success Building a  
collaborative modelling consortium for COVID-  
19 in South Africa

Achievements and Prominent aspects of this  
initiative that have led to this recognition

- NICD managed to put together modelling resources from 4 different organizations to provide the country and the world with essential and much needed information.
- This Consortium shows how important it is to combine scarce resources and collaborate across all sectors and institutions when needed.
- It is a good example to follow for us all!
- The developments of the COVID-19 pandemic in South Africa with its detection of new strains developing, was important to the whole world.

IANPHI

# ANNUAL MEETING

NOVEMBER 30 - DECEMBER 2, 2022 | HYBRID

Dr. Anne-Catherine Viso  
Secretary General  
IANPHI

## IANPHI Activity Report 2022: key achievements & progress

## Core Initiatives

1. NPHI Strengthening & Development
2. Thematic Committees
3. Regional Networks
4. External Partnerships & Funding

## Priorities for 2022

Strengthen active membership participation across initiatives

Reinforce Regional Networks and Thematic Committee activities

Secure funding to support Thematic Committees and Regional Networks

Ensure ownership and adoption of the Strategic Action Plan by all members

## Executive Board and Secretariat Activities

- Six Executive Board meetings
- Collection of dues exceeded the target set up by the Secretariat (237 090 EUR vs 210 000 EUR foreseen)
- Support to the organisation of the European and Annual meetings
- **GDPR data consent collection:** In accordance with the General Data Protection Regulation (GDPR), the Secretariat was able to collect the consent of 66.1 % of its database contacts, 97.6 % of them having replied positively
- Appointment of strategic advisors
- Strengthening the IANPHI Secretariat with two additional positions

## IANPHI Active at the Global Scale

- World Health Summit – Outsmarting pandemics and role of NPHIs with the WHO Berlin Hub
- Meetings related to the WHO and partner roadmap on public health and emergency workforce
- High-Level Expert's Meeting on “Risks and Solutions to Global Security: From the Pandemic to Future Health Threats” by the InterAction Council
- G7 technical meetings on collaborative surveillance, on Public Health Emergency Workforce for Predictable Rapid Response, on Climate Change
- Global Action Plan Senior Officials Meeting.

## IANPHI Tools

The Secretariat received one peer review request for the year 2022 from Estonia's National Institute of Health Development (NIHD). The peer review took place from October 24-28, 2022 in Tallinn, Estonia.

# NPHI BUILDING AND STRENGTHENING PROJECTS

IANPHI

# ANNUAL MEETING

NOVEMBER 30 - DECEMBER 2, 2022 | HYBRID

## BURKINA FASO

**Goal:** Increase the capacity of the NPHI to identify and respond to outbreaks, strengthen its workforce, and develop internal institutional capacity

## GUINEA

**Goal:** Strengthen the emergency response lab capacities at ANSS and the institutional mechanism for managing health emergencies

## COTE D'IVOIRE

**Goal:** Contribute to the positioning of INSP as the national center of excellence for research, and increase the quality of its training programs that are critical for public health emergency response

## NIGERIA

**Goals:** Enhance systems, human resources, and capacities that will support Nigeria CDC's transition to a world class institute

## UGANDA

**Goal:** Strengthening Border Health Programs through peer to peer training and information exchange on health risk mapping in the East African region.

## ZAMBIA

**Goals:** Strengthening public health preparedness and response and strengthening border health programs

## CHAMPS – Data to Action

- New [Case Studies](#)
  - ❖ *"Identifying Delays and Barriers to Care in Mali"*
  - ❖ *"Addressing Neonatal Nosocomial Infections in a Bangladeshi Hospital Facility"*
- CHAMPS and IANPHI are funding NPHI and Subnational Data to Action Projects in Countries where CHAMPS is working including ❖ Bangladesh ❖ Ethiopia ❖ Kenya ❖ Mozambique

# IANPHI SUPPORTED TOOLS

## Staged Development Tool: Modifications for NCDs

IANPHI, U.S. CDC's Center for Global Health Global Non-Communicable Disease (NCD) program, and CDC's NPHI program adapted the SDT for use in NCDs.

**The SDT involves three steps:**

## Strategic Planning & SDT Implementation at **ΕΟΔΥ** Greece

IANPHI and U.S. CDC traveled to Athens, Greece to meet with the president of **ΕΟΔΥ**, Theoklis Zaoutis, and heads of **ΕΟΔΥ** directorates to help the organization plan for growth that leverages their COVID response successes

INSIGHTS FOR NATIONAL PUBLIC HEALTH INSTITUTES

Subscribe to our News

### LETTER FROM THE PRESIDENT

OCTOBER 2022

Dear IANPHI colleagues,

On Sunday I sat down with Dr. Teyssie and an IANPHI delegation before the start of the World Health Summit in Berlin, and we signed a [Memorandum of Understanding between the Association and the World Health Organization](#).

This agreement marks a historic moment for both organizations and initiates collaborative action to improve public health, which will be discussed at our annual meeting. It aims to strengthen national public health capacity and capability to deliver health gains through prevention and promotion measures, and emergency preparedness and response.

I would like to warmly thank our Executive Board members, Governance Chairs of National Public Health Institutes (NPHIs), Dr. Giovanni Lombardi (United Kingdom), Dr. Shubhaya Saha (United States), Dr. Hishabeh Poudel (France) and Dr. Sabina Shrivastava (India). The webinar was opened by Dr. Sébastien Derynck of [Santé publique France](#), who is the chair of the IANPHI Thematic Committee on Climate Change and Public Health, and was moderated by Dr. Sangeeta Misra of [Ghana Health Service](#).

## IANPHI Europe Visits Poland to Learn from its Refugee Response

November 10, 2022

Temporary accommodation, kitchen and dining area, as well as clothes distribution point run by volunteers and charities in Krakow.

The conflict in Ukraine has triggered a serious humanitarian crisis that has resulted in one of the largest refugee movements in recent years. A neighbouring country to Ukraine, Poland has welcomed more than three million refugees, which left it facing a complex public health emergency.

At the invitation of the Polish national public health institute, [Instytut Higieny i Epidemiologii](#), a delegation from the IANPHI European Network visited refugee reception centres and accommodation sites in Krakow and Katowice, near the Polish-Ukraine border on May 13-15, 2022. The goal of the visit was to learn from the country's experience and challenges in responding to the influx of refugees, and to support Poland's national public health institute.

## Developing Indicators to Drive Relevant Action on Climate Change and Health

November 21, 2022

On November 14, 2022, at the initiative of the IANPHI Committee on Climate Change and Public Health, IANPHI held a webinar on Developing Indicators to Drive Relevant Action on Climate Change and Health. The session came a year after the launch of the [2022 Statement on Climate Change and Health](#) and the [United Nations Conference on Climate Change COP27](#) in Glasgow, Scotland. In the meeting, IANPHI committed to a number of actions to help National Public Health Institutes (NPHIs) improve public health interventions related to climate change, including by enhancing their capacity through knowledge sharing and supporting the identification of common indicators.

Indicators are critical tools to track and capture climate-related health impacts, harness evidence and implement effective public health interventions. The webinar featured representatives from international organizations, Alan van Duinen ([Lancet Countdown](#)) and Dr. Aleksandra Kuzmicka ([European Environment Agency](#)), and from member National Public Health Institutes (NPHIs): Dr. Giovanni Lombardi (United Kingdom), Dr. Shubhaya Saha (United States), Dr. Hishabeh Poudel (France) and Dr. Sabina Shrivastava (India). The webinar was opened by Dr. Sébastien Derynck of [Santé publique France](#), who is the chair of the IANPHI Thematic Committee on Climate Change and Public Health, and was moderated by Dr. Sangeeta Misra of [Ghana Health Service](#).

## Uganda's Public Health Fellows And Graduates Help Stem an Ebola Outbreak

Jane Frances Zabaanga, Helen Nelly Naga, Savithi Ramakrishna Katta, Thomas Kiggundu, Peter Chris Kwasungu, Robert Zengge, Daniel Kaddura, Robert Migisha, Benson Kwasiga, Alex Redden Akiro October 18, 2022

Public Health Fellows, Dr. Thomas Kiggundu, Dr. Savithi Ramakrishna Katta, Jane Frances Zabaanga, Helen Nelly Naga, Dr. Robert Zengge, Dr. Peter Chris Kwasungu, Daniel Migisha.

On September 19, 2022, a case of Ebola Virus Disease (EVD) was confirmed in Mubende District, Uganda. On that same day, Dr. Alex Akiro, the director of the Uganda Institute of Public Health (UIPH), who also chairs the IANPHI Africa Network, received a call from the Ministry of Health (MoH) requesting a team of Public Health Fellowship Program (PHFP) fellows to immediately engage in the EVD response. A response team of six fellows and two supervisors with backgrounds in medicine, nursing, pharmacy, statistics, medical microbiology, and infection prevention and control was rapidly assembled. The team travelled to the field the next morning. EVD requires very rapid response to reduce disease spread. Some of the most important public

## IANPHI

The International Association of National Public Health Institutes (IANPHI) collectively builds public health capacity and capabilities by connecting, developing and strengthening national public health institutes worldwide.

### What Are National Public Health Institutes?

National public health institutes (NPHIs) are science-based organizations that provide national leadership and coordination for public health, often under the ministry of health or closely affiliated to it. They vary in scope and size. Their core public health functions often include:

- Epidemiology and analysis of health data
- Public health surveillance, outbreak investigation, and control of risks and threats to public health
- Production of the report of emergencies and diseases on health
- Public health research
- Human resource development and training
- Public health laboratory services

### What Makes IANPHI Unique?

IANPHI is the only global organization that strengthens NPHIs using an evidence-based international framework for development, capacity-building and targeted investments.

IANPHI's unique focus on NPHIs has led to improvements in capacity, including cultural, surveillance and response for COVID-19, Ebola, Zika, and other urgent threats that require early, comprehensive public health cooperation across borders. IANPHI members also exchange best practices and technical capacity for major threats to public health such as tobacco use, and risk factors for chronic conditions such as diabetes and heart disease.
